GET OFF MY ORBIT!

Heavy Space traffic ahead.

In the last ten years, the number of satellites launched per year increased ten-fold to more than 600 satellites per year. Simultaneously, space debris' rapid growth presents an ever-intensifying threat to the future of Space activity and security.

More than 23'000 human-made objects are tracked in Space today.

NEXT-GEN SPACE FOR EARTH

Space4Impact

We believe Space can do more for Earth

Space**4Impact** wants to maximize the positive impact of space technologies by linking New Space startups to new markets in line with the UN SDGs worldwide.
